

THE ONLY SMART IN-FLOOR POOL CLEANING SYSTEM

THE SMARTEST CLEANING TECHNOLOGY
AT THE TOUCH OF A FINGER

pulconekt IN-FLOOR POOL CLEANING SYSTEM

EASY TO USE, EFFECTIVE, EFFICIENT

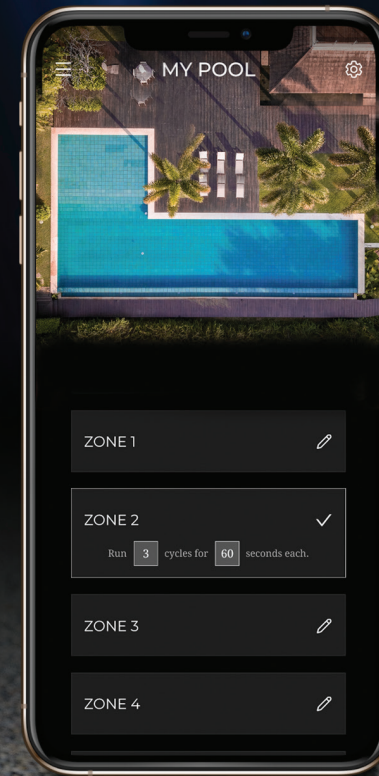

The PUL in-floor cleaning system is driven by smart technology for the easiest user experience through a customized PUL Conekt App.

PUL creates a custom cleaning solution for each pool that combines an engineered layout and cleaning program with zone-by-zone cleaning in order to maximize system effectiveness.

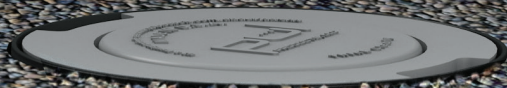

Up to 30% more efficient than other in-floor systems, by producing the highest flow rate at the lowest pump speeds, saving energy and money.

FULLY ADJUSTABLE

The PUL in-floor cleaning system is engineered and programmed to provide optimal cleaning performance for your unique pool design. In addition to monitoring the cleaning system's operation, all cleaning functions are fully adjustable through the PUL Conekt App.

Your specific pool design and cleaning zone map is featured on the app.

ZONE-BY-ZONE CLEANING

The PUL Jets pop up and release a powerful water current to completely remove debris from one zone before continuing on to the next. Intelligently moving dirt and debris to the Hydro-Trough collection zone and into the drain. After the cleaning cycle is complete, the PUL Jets retract and become virtually invisible.

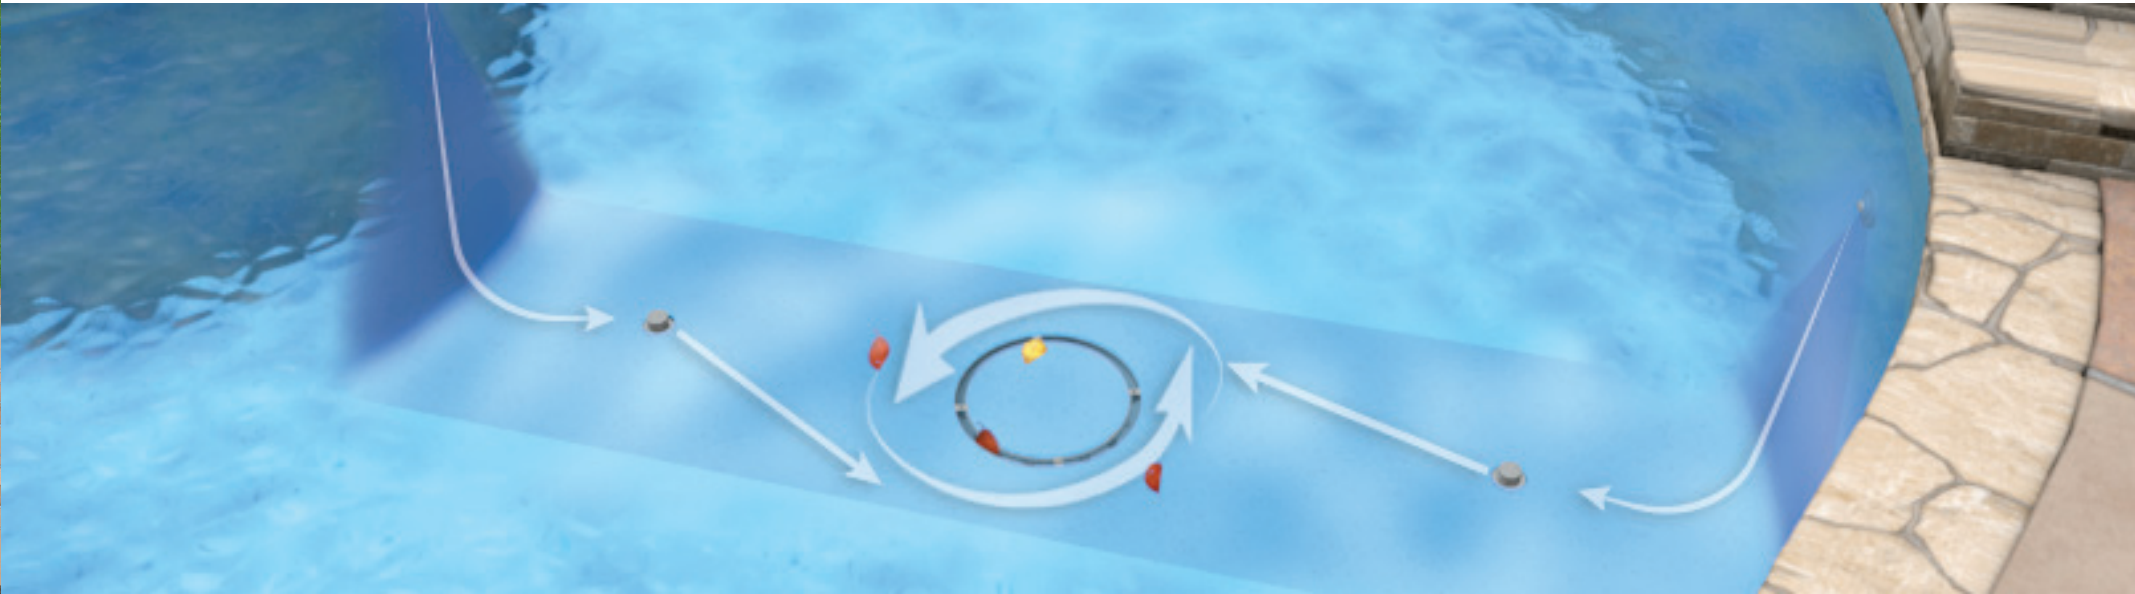

Control the PUL
cleaning system from
the PUL Conekt App.

Hydro-Trough

YOUR POOL SHOULD BE A PLACE OF RELAXATION.
SPEND LESS TIME MAINTAINING IT AND MORE TIME ENJOYING IT!

HYDRO-TROUGH

This PUL standard cleaning feature utilizes a combination of PUL Jets and PUL Conekt logic to produce a strategic movement of water around the drain to optimize the collection and removal of dirt and debris.

PERFEKT

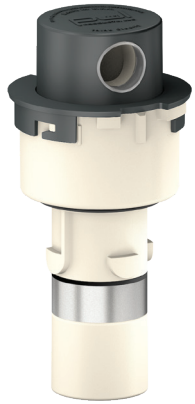

CLEAN, HEALTHY, AND ENVIRONMENTALLY CONSCIOUS

In-floor cleaning is the only pool cleaning method that works by completely circulating all areas of your pool, from bottom to top. This circulation of water not only removes dirt and debris, but also effectively distributes chemicals, eliminates hot and cold spots, and prevents stagnant water that could promote algae growth.
